BODAPATI BHARAT CHANDRA

Hyderabad, India | 9703288878 | bc833498@gmail.com
LinkedIn | GitHub | Portfolio | Medium

SUMMARY

Final-year CSE student building Python/FastAPI backends, full-stack products, AI-assisted research tools and real-time aerospace systems. Built offline compliance, collaboration, payment and telemetry workflows. Technical SEO work on bharatchandra.me, GARI and Vijetha Digital, achieved #1 organic Google placement for targeted branded searches: Bodapati Bharat Chandra, GARI GITAM and Vijetha Digital.

EDUCATION

GITAM University, Hyderabad **2027**
B.Tech, Computer Science and Engineering CGPA: 7.20
Class XII: 64.3% | Class X: 97.33%

EXPERIENCE

Full-Stack Engineering Intern – CardioPulmo AI Private Limited Oct 2026 – Present
Remote | Multimodal clinical decision support

- Integrate clinical decision-support outputs with application workflows to present explainable, graded cardiopulmonary risk assessments from diagnostic inputs.
- Support frontend/API integration, diagnostic-data ingestion, database schemas, automated tests and engineering documentation.

Backend & ML Lead – GARI, GITAM Aerospace Rocketry Initiative Feb 2026 – Present
Ground-control architecture, telemetry and sensor fusion

- Lead backend integration for IN-SPACe rocket and CanSat systems across 46-byte packet validation, WebSocket telemetry, Kalman sensor fusion, flight-state logic and safety alerts.
- Built gari.live; implemented structured data, canonical URLs, sitemap/robots support and Search Console setup.
- Supported GARI sponsorship outreach by identifying relevant organizations and submitting sponsorship forms through their websites.

Backend Developer – Tender & Vendor Compliance Platform, BHEL Hyderabad 2026
Python, FastAPI, SQLite and retrieval-based document analysis

- Developed an offline FastAPI/SQLite workflow to extract tender PDFs and specification spreadsheets, retrieve evidence, and compare vendor proposals against requirements.
- Added multi-agent review with source/page citations, deterministic fallback, human approval and structured Excel findings for air-gapped procurement.

Backend Developer – Aubrynt Jun 2026
GuardianTutor AI | Backend/web development and product research

- Contributed backend/web development for GuardianTutor AI and product/market research to inform feature planning.

PROJECTS

TruvantaAI – AI-Assisted Research & Fact-Checking Live | GitHub
FastAPI, RoBERTa, RAG, LangGraph, PostgreSQL/pgvector

- Combine RoBERTa classification, BM25/pgvector retrieval, reranking and LangGraph RAG to compare claims with supporting and contradicting evidence.
- Maintain persistent fact memory, validate citations, re-search when evidence is weak, and return uncertainty-aware verdicts with TF-IDF fallback.

Likhitex – Collaborative LaTeX Platform GitHub
Next.js, TypeScript, FastAPI, PostgreSQL, Redis, Docker

- Built real-time collaborative editing, multi-file projects, live presence, PDF preview and document version history.
- Sandboxed LaTeX compilation in network-disabled containers with read-only filesystems and resource limits; added access controls and single-use WebSocket tickets.

CAN-7USAT Ground Control Station GitHub
Python, FastAPI, WebSockets, SQLite, Kalman filtering

- Decoded checksum-validated 46-byte telemetry packets and streamed vehicle data to operator interfaces via WebSockets.
- Integrated Kalman sensor fusion, six-state flight logic, persistent logs and signal-loss, geofence and battery alerts.

Vijetha Digital – Business Website & Commerce Platform Live Site | Store Dev | GitHub
React, FastAPI, PostgreSQL, Redis, Razorpay

- Built the live digital-printing website and improved technical SEO with metadata, service/location pages, structured data, sitemaps and internal links.
- Developing the separate commerce platform with server-side pricing, order-state controls, role-based access, verified Razorpay webhooks and notifications.

Deepthi Hospital Management System Live | GitHub
React, FastAPI, PostgreSQL, SQLAlchemy, Razorpay

- Built public, patient and staff workflows for appointments, prescriptions, lab reports, records and billing.
- Implemented JWT/RBAC, async SQLAlchemy/PostgreSQL access, migrations and Razorpay signature/webhook verification.

TECHNICAL SKILLS

Languages & Core CS: Python, SQL, C, Java (basic), OOP, Data Structures & Algorithms, DBMS

Backend & Data: FastAPI, REST APIs, PostgreSQL, SQLite, SQLAlchemy, Redis

Frontend: React, JavaScript, TypeScript, HTML/CSS

AI & Prompting: Prompt Engineering, Gemini API integration, RAG, LangGraph, basic ML

Tools & Testing: Git/GitHub, Docker, GitHub Actions, pytest, debugging, API testing, Vercel, Render

CERTIFICATIONS

Claude 101 – Anthropic | AI Fluency Framework & Foundations – Anthropic | Building RAG Apps Using MongoDB
